

## PAINTCO FIRE RETARDANT CLEAR 64

### DESCRIPTION

- Paintco Fire Retardant clear a transparent coating is based on chlorinated rubber and chlorinated plastisizer. It releases chlorine at high temperature and thus controls the spreading of fire. Suitable for application on wood and steel under exterior and interior condition.

### PHYSICAL DATA

Pigment	:	None
No. of component	:	One
Specific gravity	:	Approx. 0.98
Solids by volume	:	Approx. 28 %
Flame spreading	:	Spreading rate not over 25 & smoke development not over 50. (tested as per: ASTM D 3806)
Drying time at 30°C	:	Dust dry : approx. 20 mins. Hard dry : approx. 2 hours
DFT	:	30 Microns
Theoretical coverage at 30microns	:	9.3 m <sup>2</sup> /lit
Flash point	:	26°C

### APPLICATION DATA

- Paintco Fire Retardant Clear can be applied by spray or brush. For spraying reduce by using thinner no.32. For wood surface apply paintco Fire Retardant Sealer 63. Over other surfaces it can be applied directly, 2-3 coats.

### REMARKS

- Paintco Fire Retardant clear cannot resist fire, however flame of fire is prevented from spreading for certain period of time.
