

PAINTCO WOOD PRESERVATIVE 77655

DESCRIPTION

- Paintco Wood Preservative contains long lasting fungicides which retard the destructive growth of mildew and rot and preserves the wood from the destructive forces of nature for years to come. It is available in light green colour but, if specified, a colourless product is also offered.

PHYSICAL DATA

Colours	:	Light green or transparent
Specific gravity	:	Approx. 0.9
Flash point	:	39°C

APPLICATION DATA

- Paintco Wood Preservative should be applied over clean and dry wood. The wood should be soaked in the preservative.
- Do not apply in direct hot sunlight. The heat will otherwise “set” the preservative before it has a change to penetrate into the wood. Apply liberally with brush or roller and allow the wood to absorb the preservative to saturation.

Type of thinner	:	thinner no 211
Coverage	:	10 m ² /liter

REMARKS

- Suitable for all types of wood. Recommended for initial coating only. Subsequently, stain or varnish should be applied. Clean tools with thinner no. 211.
