APPLICATION DATA

Application Method	:	Stainless Steel Trowel or Spatula
Type of Thinner	:	Water

APPLICATION METHOD:-

- Surface on which marble finish is applied has to be sound, clean dry and completely free from dust, dirt, oil and contaminants .
- Apply a coat of Paintco latex primer sealer or Paintco wall primer.
- Apply one coat of Paintco stucco putty to fill the imperfections and obtain an smooth surface.
- Apply two coats of Paintco interior emulsion or Paintco washable emulsion with roller.
- Apply marble putty on to small area using spatula, then apply the same Across the entire surfaces using a scraper and Let it dry
- Repeat the same process of application two times to obtain a very smooth marble like finish.
- can create different patterns by controlling the direction of scraper such as wavy lines. Cross lines or diagonal patterns. When dry sand the surface with 1000 abrasive papers.
- Finally create the marble effect by polishing with the steel trowel.

Note

- polishing will bring out the glossy and dark/light effects by increasing the polishing.

Remarks :

- Paintco Marble Putty creates the marble effect by polishing with the spatula. Ensure that all areas are polished smoothly.
