

PAINTCO TENNIS COURT PAINT 4560

DESCRIPTION

- Paintco Tennis Court Paint is vinyl chloride copolymer based floor paint and is abrasion resistant coating suitable for application over concrete and wooden floors. It can be used for internal and external floors, parking areas and ideally suitable for tennis courts. The coating is highly resistant to hot sun, rain and mild household chemicals. Full cured coating is able to withstand constant traffic and scuff of shoes.

PHYSICAL DATA

Pigments	:	Rutile titanium dioxide and /or color pigments and functional extenders
Colours	:	White ,grey, red oxide and green oxide
Appearance	:	Eggshell and matt
No. of components	:	One
Specific gravity	:	1.25 - 1.4 depending on colour
Solids by volume	:	35 - 38
Drying time at 30°C	:	Dust dry : 30 minutes Hard dry : 2 hours
Curing before putting it to use	:	Min. 24 hours
No. of coats	:	Minimum 2 coats
Recommended DFT	:	60 microns
Theoretical coverage at 60 microns DFT	:	5.8 - 6.3 m ² /L
Flash point	:	26°C

APPLICATION DATA

- Concrete floors must be thoroughly cured, dry and weathered before painting. For quick job, the concrete surface should be acid-etched with 10% diluted Hydrochloric acid followed by thoroughly rinsing with clean water. Acid etching improves adhesion of paints and also neutralizes free alkali. Thorough washing with water is essential.

Application methods	:	Brush, shortnap roller and spray
Thinner	:	Thinner no. 32
Percentage of thinner	:	10% for first coat 5% for second or third coat
